SUMMARY

Passionate tech enthusiast focused on building scalable backend systems and real-time web applications. Driven by problem-solving and continuous learning, with hands-on experience in automation workflows, API integrations, and modern full-stack projects, while remaining eager to learn and explore new technologies.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript

Frontend: React.js, Tailwind CSS, HTML

Backend: Flask, FastAPI, Node.js

Database: MySQL, MongoDB

Tools & DevOps: Docker, Postman, Git

Others: OpenAI API (basic), DSA

INTERNSHIP

Python Full Stack Developer (Virtual)

JAN 2025 - MAR 2025

EduSkills Foundation

- Developed and deployed a full-stack web application using Python (Flask/FastAPI), JavaScript, and SQL, with focus on scalable backend and responsive UI design.
- Designed RESTful APIs and integrated them with front-end interfaces to enable seamless data exchange and real-time updates.
- Implemented authentication, database management, and error handling modules to improve application security and reliability.
- Collaborated in an agile environment using Git/GitHub for version control, enhancing teamwork, debugging, and end-to-end project delivery.

PROJECTS

EchoChat | Python, FastAPI, WebSockets, MongoDB, JavaScript

MAR 2026 - MAY 2026

- Developed a real-time messaging platform enabling instant user-to-user communication.
- Implemented WebSocket-based live chat functionality using FastAPI for low-latency message delivery.
- Built secure authentication systems and scalable backend APIs with MongoDB integration.
- Designed responsive frontend interfaces and structured full-stack architecture for seamless user experience.

AI Chatbot | Python, NLP, API Integration, Automation

SEP 2025 - OCT 2025

- Developed an AI-powered assistant to automate user interactions and task execution through intelligent responses.
- Integrated APIs and automation workflows to handle real-time requests and improve user experience.
- Implemented natural language processing features for efficient query handling and response generation.
- Designed a scalable backend structure to support future enhancements and additional integrations.

WhatsApp Assistant | Python, n8n Workflow Automation, API Integration

JUL 2025 - AUG 2025

- Built an automated WhatsApp assistant leveraging n8n workflows to streamline communication and task management.
- Integrated third-party APIs for sending and receiving WhatsApp messages, enabling real-time user interaction.
- Implemented automation workflows for notifications, reminders, and message handling to reduce manual effort.
- Designed scalable workflow architecture for efficient automation and future feature expansion.

CERTIFICATES

- 100 days DSA - Leetcode
- Generative AI Literacy - Nasscom
- DSA using Java - Infosys
- Python Full Stack - EduSkills

EDUCATION

Bachelor of Technology – Computer Science & Engineering (77%)

AUG 2022 – JUL 2026

Meerut Institute of Technology, Meerut
